	6201 Span-A-Year Non-Laminated		

calendars *defined*

Discover **ALL** the options a calendar has to offer.

1 Stapled Binding

Choose stapled binding, also called saddle stitching, for an economical version of a calendar that is also perfect for direct mail.

2 Spiral & Twin Loop Binding

These types of binding provide a polished look and are great when you want your calendar to lie flat.

3 Tinning

Large commercial calendars can take a beating. Tinning, a process of crimping pages of a calendar with a metal strip, adds durability and keeps your calendar hanging neatly.

4 Window Ad

A window ad prints in the middle of the calendar, putting your message at the center of attention.

5 Drop Ad

A drop ad spans the bottom of a calendar, providing a large area for your brand's message.

6 Insert Pages

Want to add coupons or a message to your customers? Use insert pages to make your calendar more than a tool for keeping track of appointments.

7 Backmount

The last page of the calendar—or the backmount—is another place to include information valuable to your customers. Choose from over 15 different stock themes or create your own.

8 Personalization

Go the extra mile and make your customers feel special. You can print individual names on each calendar.

9 QR Code

QR codes are a kind of barcode that can be read by many mobile devices. Use them to put instant information, like special offers or company information, in the palm of your customer's hand.

10 Phantom Overprint

A screened-back version of your logo or other special design can add interest to your calendar's date grid.

11 Date Block Overprint

Go beyond the typical holidays. You can note company closures, special deadlines, or corporate facts on your calendar.

12 Augmented Reality

Bring your calendar to life with Pixaction 2.0. Using a free app, you can launch videos and other media right from the calendar's image.
